Congratulations on your purchase of a Silverado or Sierra 2-Mode Hybrid. Please read this information about your vehicle's features and your Owner Manual to ensure an outstanding ownership experience. Note that your vehicle may not include all the features described in this booklet. Keep this booklet with your Owner Manual for easy reference.

Getting to Know Your Silverado/Sierra 2-Mode Hybrid

DRIVING YOUR HYBRID

Hybrid System

Your Silverado or Sierra 2-Mode Hybrid drives just like a regular vehicle, but it has several fuel-saving features that increase vehicle efficiency and maximize fuel economy. The hybrid features of your vehicle are enabled after the engine warms up to proper operating temperature.

Your 2-Mode Hybrid vehicle includes electric motors housed in the electrically variable hybrid transmission, a Vortec V8 engine with Active Fuel Management™ and a 300-volt Energy Storage System. The V8 engine is not designed for E85 fuel.

A sophisticated electronic control module selects the most efficient mode of operation based on the amount of power demanded by the driver and battery charge level.

In the first mode, under light acceleration and at speeds up to 30 mph, the vehicle may be powered by only the electric motors, the engine, or a combination of both.

The fuel-saving electric-only feature is referred to as Auto Stop. It will turn off the engine until the driver requests increased power or the hybrid battery needs charging.

The second mode is used primarily at highway speeds and when trailering, in conjunction with the engine’s Active Fuel Management, to optimize fuel economy while providing power when conditions demand it.

The hybrid battery stores power for use when the vehicle’s engine is off while in Auto Stop mode and supplies power for the various electric motors used in the 2-Mode Hybrid system. The hybrid battery is recharged by the vehicle during deceleration and while braking. It does not need to be plugged into an electrical outlet.

Typical Hybrid Sounds

Your hybrid vehicle has several electric motors, including the motors in the transmission that help power the vehicle and those in the Hybrid Energy Storage System. At times, you may hear these motors start up or stop, and they might produce a slight whirring, humming or blowing sound typical of electric motors. These are normal sounds found on a hybrid vehicle and may be more noticeable when the vehicle is operating in the Auto Stop mode with the engine off.

Your hybrid vehicle also does not make an audible starter noise when starting the vehicle. Therefore, it may seem to take slightly longer to start than a non-hybrid vehicle. If the key is not held in the start position long enough, the vehicle will not start, but the instrument panel cluster warning lights will illuminate, requiring the key to be turned to the start position again. You may also experience a slight hesitation when selecting Reverse after starting the vehicle.

See your Hybrid Owner Manual.
The economy gauge shows when vehicle fuel economy is being maximized. Driving with the needle in the solid green area indicates driving behavior that maximizes fuel economy. Accelerating too aggressively will move the needle to the right, while braking too aggressively will move the needle to the left. Either of these behaviors will move the needle outside the green area, indicating less fuel efficient driving.

See your Hybrid Owner Manual.

The automatic engine stop/start feature, known as Auto Stop, turns off the engine at lower speeds until the Hybrid Energy Storage System needs charging or the driver requests increased power.

While the vehicle is in Auto Stop mode, the needle on the tachometer moves to the AUTO STOP position. The oil pressure gauge also will drop to zero. While lightly accelerating, the vehicle will be propelled only by the electric motors. During heavy acceleration, both the engine and electric motors supply power. A sensation similar to a transmission gear change may be felt as the vehicle changes between electric power and engine power.

While in Auto Stop, all of the regular vehicle features are available, such as power steering and brakes, the audio system and power accessories.

After parking the vehicle and turning off the engine by rotating the key to the Off position, the tachometer needle will move to the Off position.

See your Hybrid Owner Manual.

The engine will remain running under certain conditions. Some conditions that will lead to an engine Auto Stop override include:

- Driving in Reverse.
- The engine or transmission is not yet warmed up.
- The transmission temperature or Energy Storage System (ESS) temperature is high.
- The engine is required to run to help achieve the selected climate control heating and/or cooling setting.
- The Hybrid ESS charge is low.
- The hood is not fully closed.
- The Check Engine light is illuminated.
- When playing the radio or using electrical accessories with the vehicle off, do not leave the key in the ACC position for more than 30 minutes. Instead, leave the vehicle running and rely on the Auto Stop feature to supply power.

See your Hybrid Owner Manual.
Getting to Know Your Silverado/Sierra 2-Mode Hybrid

The Engine Will Restart When:

With the engine off in Auto Stop mode, certain conditions will require the engine to restart. Some conditions that will lead to an engine restart include:

- The accelerator pedal is applied, demanding heavy acceleration. This will not occur when the vehicle is in Park.
- The engine is required to run to help achieve the selected climate control heating and/or cooling setting.
- The Hybrid Energy Storage System charge becomes low and requires recharging.
- Shifting into Reverse.
- When the hood is unlatched or open.

Maximizing Fuel Economy

Along with the advanced technology of the 2-Mode Hybrid, your driving behavior is a big contributor to your vehicle’s fuel economy. Modifying your driving habits will improve your fuel mileage. Here are several fuel-saving tips:

- Combine short trips to minimize cold engine starts, which reduce fuel economy.
- Avoid quick starts and stops.
- Accelerate moderately and drive at a steady speed.
- Anticipate traffic flow and brake moderately or coast.
- Use the air conditioning and defrost modes only when necessary.

- Minimize electrical accessory operation by turning off items such as the rear defogger when they are not needed.
- Use the remote start feature sparingly (if equipped). This feature turns the engine on, consuming fuel at idle.
- Do not warm up the engine by idling. Even on the coldest days, driving will help the engine warm up faster.
- Selecting the AUTO feature on 4WD models is less economical than 2WD.
- Unload unnecessary cargo to reduce the amount of weight in the vehicle.
- Regularly check and maintain proper tire pressure.
- Maintain your vehicle to keep it running cleaner and more efficiently.

Hybrid Energy Storage System

Your vehicle has a standard 12-volt battery located under the hood, and a 300-volt Hybrid Energy Storage System (ESS) located under the second-row seat. The Hybrid ESS provides power to the electric motors and will recharge itself as necessary when idling, driving, and/or when braking efficiently. The vehicle will charge and discharge the high voltage ESS when it is most efficient to do so.

Regenerative Braking

Regenerative braking recaptures some of the energy from the moving vehicle when coasting or braking and turns it into electrical energy. This energy is stored in the
Your vehicle has an electrically powered air conditioning compressor that provides continuous air conditioning operation and passenger comfort while the engine cycles on and off.

When operating the climate control system, select the AUTO mode and the desired temperature setting to allow the system to automatically adjust fan speed and airflow direction. In the AUTO mode, the system adjusts to make the most efficient use of electrical power.

To get the most engine off time and the highest fuel savings, select a higher temperature setting or turn off the air conditioning. Continuous air conditioning use can cause the engine to start more frequently when in the Auto Stop mode.

Due to the quiet operation of the vehicle, especially when the engine has turned off, some noise may be heard occasionally from the air conditioning compressor.

To view the hybrid system information on the Navigation Entertainment System (if equipped), press the MENU hard key, and then touch the Hybrid screen button.

The hybrid screen has icons of an engine, battery, transmission and wheels. While the vehicle is in operation, these icons will change color indicating the source of power to the transmission and, ultimately, the wheels. Power can be provided entirely by the engine, electric motors, or a combination of both. An icon will also indicate when the battery is being recharged by the regenerative braking system. A text box at the bottom of the screen will indicate the current method of power.

In emergency situations, First Responders can disable the 300-volt Hybrid Energy Storage System by cutting the 12-volt battery cables that are clearly labeled in the engine compartment.
The main features of the instrument panel include:

A. Driver Information Center Buttons
B. Turn Signal/Multifunction Lever
C. Instrument Panel Cluster
D. Shift Lever
E. Daytime Running Lamp Sensor
F. Audio System/Navigation Entertainment System (if equipped)
G. Exterior Lamps Control
H. Dome Lamp Off Button/Instrument Panel Brightness Knob
I. Cruise Control Buttons
J. Tilt Steering Wheel Lever
K. Horn
L. Audio Steering Wheel Controls
M. Automatic Transfer Case Control (if equipped – 4WD only)
N. 12-Volt Accessory Power Outlets
O. StabiliTrak Button
P. Rear Parking Assist Button
Q. Climate Controls

See Section 3 of your Owner Manual.
Your vehicle’s instrument panel cluster is designed to let you know at a glance how your vehicle is running. It includes these key features:

A. Economy Gauge
B. Auto Stop Mark
C. StabiliTrak Indicator Light
D. Low Tire Pressure Warning Light
E. Security Light
F. Tachometer
G. Check Engine Light
H. Speedometer
I. Safety Belt Reminder Light
J. Oil Pressure Gauge
K. Fuel Gauge
L. Driver Information Center/Odometer
M. Airbag Readiness Light
N. Antilock Brake System Warning Light
O. Engine Coolant Temperature Gauge

**Note:** The instrument panel cluster is designed to let you know about many important aspects of your vehicle’s operation. It is important to read your Owner Manual and become familiar with the information being relayed to you by the lights, gauges and indicators, as well as what action can be taken to ensure safety and to prevent damage.

*See Section 3 of your Owner Manual.*
Driver Information Center

Your vehicle’s Driver Information Center (DIC) provides vehicle information, vehicle feature customization (if equipped), and vehicle warning messages. The DIC messages will be shown on the instrument panel cluster display.

DIC Buttons

The following DIC buttons are located on the left side of the instrument panel cluster:

✓ (Trip/Fuel): Press this button to display the outside temperature, compass, odometer, trip odometer, fuel range, average economy, fuel used, timer, transmission temperature, instantaneous economy, Active Fuel Management™, and battery voltage.

☎️ (Vehicle Information): Press this button to display the oil life, English/Metric units, tire pressures, engine hours, Remote Keyless Entry programming and compass settings.

✓ (Customization): Press this button to customize certain vehicle features to your preference.

✓ (Set/Reset): Press this button to set or reset certain vehicle functions and to acknowledge DIC messages.

Customization Features

To customize features:

1. With the vehicle in Park, turn on the ignition.
2. Press the ☎️ (Customization) button to display available customization features.
3. With the desired customization feature displayed, press the ✓ (Set/Reset) button to access the feature settings.
4. Press the ☎️ button to scroll through the available settings.
5. With the desired setting displayed, press the ✓ button to select it.
6. Press the ☎️ button to scroll to the next feature.
7. To exit the Feature Settings menu, press the ☎️ button until EXIT FEATURE SETTINGS is displayed and then press ✓, or press the ☎️ button or the ✉️ button.

Customization features may include:

• Display Language
• Auto Door Lock
• Auto Door Unlock
• Remote Door Lock
• Remote Door Unlock
• Delay Door Lock
• Exit Lighting
• Approach Lighting
• Chime Volume
• Remote Start (if equipped)
• Factory Settings
• Exit Feature Settings
Compass Operation
Refer to your Owner Manual to adjust for compass variance when traveling on a long-distance trip or to calibrate the compass.

Warning Lights
The DIC provides a variety of vehicle messages (depending on optional equipment) as well as warnings if a problem is sensed in a vehicle system.

• To acknowledge a message and clear it from the display, press any of the DIC buttons. Some urgent messages cannot be cleared from the DIC display.

If you have a current OnStar subscription and a warning message appears, you can press the blue OnStar button and speak to an OnStar Advisor. In many vehicles, OnStar Advisors can access certain diagnostic information and can tell you how serious the condition is and what you should do about it.

Note: Your vehicle’s warning lights provide critical information that can prevent damage to your vehicle. Review your Owner Manual to become familiar with the information and the action required.

SAFETY & SECURITY

Remote Keyless Entry
The Remote Keyless Entry (RKE) transmitter includes the following functions:

-lock: Press this button to lock all the doors. RKE feedback (light flash and/or horn chirp) can be programmed using the DIC.

-Unlock: Press this button to unlock the driver’s door. If the button is pressed again within five seconds, all remaining doors will unlock. RKE feedback (light flash and/or horn chirp) can be programmed using the DIC.

- Vehicle Locator/Panic Alarm: Press this button to locate your vehicle. The turn signal lamps will flash and the horn will sound three times. Press and hold the button to activate the panic alarm. The turn signal lamps will flash and the horn will sound for 30 seconds. Press the button again or turn the ignition to Run to cancel the panic alarm.

See Section 2 of your Owner Manual.

See Section 3 of your Owner Manual.
Content Theft-Deterrent System

The content theft-deterrent alarm system will not be armed or disarmed if the doors are locked or unlocked with a key or the manual door lock.

- To arm the system, lock the doors using the RKE transmitter. The security light on the instrument panel cluster will flash for approximately 30 seconds and then turn off, indicating the alarm is activated.
- To disarm the system, unlock the doors using the RKE transmitter.

See Section 2 of your Owner Manual.

OnStar® (if equipped)

Your vehicle may feature the OnStar Safe & Sound Plan or the uplevel OnStar Directions & Connections Plan, with one year of OnStar service from the date you purchased your new vehicle.

OnStar offers a variety of capabilities, such as Remote Door Unlock, Automatic Crash Response, and Hands-Free Calling. In addition, most vehicles can get driving directions using Turn-by-Turn Navigation or Destination Download. OnStar Advisors can send a planned route to your vehicle and, as you approach a turn, instructions play over the speakers or are displayed on the navigation screen (if equipped).

Press the OnStar button to ask an OnStar Advisor about the service plan you have or to upgrade your plan. For more information, refer to your OnStar Owner’s Guide, call 1-888-4-ONSTAR (1-888-466-7827), or visit onstar.com.

See Section 2 of your Owner Manual.

COMFORT

Seat Adjustments

The power and manual seat controls are located on the outboard side of the seat.

Lumbar Adjustment

- Turn the manual lumbar adjustment knob (A) to adjust lumbar support.

Power Seat Adjustment

- Use the power seat control (B) to move the seat forward or rearward and to raise or lower the front or rear of the seat cushion.

Recline Adjustment

- Lift the manual recline adjustment lever (C) to adjust the position of the seatback.

See Section 1 of your Owner Manual.

Sun Visor Adjustment

To help block the glare of the sun, the sun visor can be detached from the center mount and moved along the slide rod.

See Section 2 of your Owner Manual.
Automatic Climate Controls

The automatic climate control system is able to maintain the desired individual temperature for the driver and front seat passenger. The system adjusts the airflow mode, fan speed, air conditioning and recirculation functions to reach the set temperature(s) as quickly as possible.

To set the automatic mode:
1. Press the AUTO button.
2. Set the driver’s and front passenger’s temperature using the + or – temperature buttons.

Manual Operation

To operate the system manually, use the following controls:

- **(On/Off)**: Press this button to turn the system on or off.
- **+ – (Temperature Control)**: Press the + or – temperature button(s) to raise or lower the temperature setting(s).
- **(Fan)**: Press the up or down arrow to increase or decrease fan speed.
- **(Airflow Mode)**: Press the up or down button to change the direction of the airflow as well as to select the defog mode.
- **PASS (Passenger Temperature Control)**: Press this button to turn off the passenger temperature setting.
- **(Air Conditioning)**: Press this button to turn the air conditioning system on or off.
- **(Recirculation)**: Press this button to recirculate inside air through the vehicle. This mode keeps outside air from entering the vehicle.
- **(Outside Air)**: Press this button to allow outside air to enter the vehicle.
- **(Defrost)**: Press this button to direct most of the air to the windshield and some air to the side window outlets.
- **(Rear Window Defogger)** (if equipped): Press this button to activate the rear window defogger and the heated outside rearview mirrors (if equipped). The defogger and/or heated mirrors will shut off automatically or can be turned off by pressing the button again.

See Section 3 of your Owner Manual.
While most of the features on your radio will look familiar, following are some that may be new:

- **Power/Volume**: Press this knob to turn the system on or off. Turn the knob to adjust the volume.

- **Tune**: Turn this knob to select radio stations or, when a CD is playing, to select a track or MP3 file. Press the knob to adjust the tone (bass/treble) or speakers (balance/fade).

- **Information**: Press this button to switch the display between the radio station frequency and the time. If equipped, press this button to display additional text information related to the current FM-RDS or XM station, or MP3 song.

- **Band**: Press this button to switch to AM, FM, or XM (if equipped). With a CD playing, press this button to switch to the radio.

- **CD/AUX**: Press this button to play a CD instead of the radio. Press again and the system will automatically search for an auxiliary input device such as a portable audio player.

**FAV (Favorite)**: Press this button to go through up to six pages of any combination (AM, FM, or XM, if equipped) of preset favorite radio stations. On each page, up to six stations are available by using the six pushbuttons below the radio display.

**MENU**: Press this button to access the radio setup menu.

**CAT (Category)**: Press this button to find XM stations (if equipped) within a desired category.

**Auxiliary Input Jack**: A portable audio player, such as an MP3 player or a cassette player, can be connected to the auxiliary input jack located on the radio. Press the CD/AUX button to begin playing audio from the player over the vehicle speakers. To optimize speaker volume, fully increase the volume on the portable audio player.

**Note**: Engaging in extended searching for specific audio stations or songs by using buttons and knobs — or giving extended attention to entertainment tasks — can lead you to look away from the road frequently or for prolonged periods, which may cause you to miss seeing things on the road that you need to see. Avoid engaging in extended searching for specific items while driving.

**Setting Favorite Stations**

Before setting your favorite stations, shift the vehicle into Park.

You can set up to six pages of any combination (AM, FM, or XM, if equipped) of favorite radio stations, with up to six stations stored on each page.
To set the number of favorite station pages:
1. Press the MENU button to display the radio setup menu.
2. Press the pushbutton located below the FAV 1–6 label on the radio display.
3. Select the desired number of favorite station pages.
4. Press the FAV button. You may now begin storing your favorite stations for the chosen number of pages.

To store favorite stations:
1. Press the BAND button to select the band (AM, FM, or XM, if equipped).
2. Tune in the desired radio station.
3. Press the FAV button to display the page where the station is to be stored.
4. Press and hold one of the six pushbuttons until a beep sounds.
5. Repeat the steps for each pushbutton on each page.

Setting the Time
To set the time:
1. Turn on the radio.
2. Press the (Clock) button. Or, if equipped, press the MENU button until the clock option is displayed; and then press the pushbutton located under the clock option label. The HR, MIN, MM, DD, YYYY labels will appear on the display.
3. Press the pushbutton under any of the labels to be changed.
4. Press the pushbutton again, the right SEEK arrow or the FWD button to increase the numbers. Press the left SEEK arrow or the REV button to decrease the numbers. Rotating the (Tune) knob also will increase or decrease the selected label.
5. Press the Clock or MENU button again to set the currently displayed time and date.

Radio Data System
When you tune to a Radio Data System (RDS) station, the station name or call letters will appear on the display instead of the frequency. Depending on the RDS station, additional text information may be available by pressing the (Information) button.

RDS features are available for use only on FM stations that broadcast RDS information. RDS relies on receiving specific information from these stations and will work only when the information is available.

See Section 3 of your Owner Manual.
The Navigation Entertainment System provides you with detailed maps of all major highways and roads throughout the United States and Canada. In addition, the system offers a variety of enhanced audio features and hybrid system information.

To operate the system, press the hard keys next to the touch screen to access the main menus. Touch the words or commands shaped like a button in the on-screen menus and submenus to select system functions.

The controls and hard keys of the system include:

- **Power/Volume**: Press this knob to turn the system on or off. Turn the knob to adjust the volume.
- **Tune/Sound**: Press this knob to change tone/speaker positions or audio settings. Turn the knob to tune in a radio station.
- **NAV (Navigation)**: Press this key to view the map screen.
- **DEST (Destination)**: Press this key to access the destination entry screen.
- **RPT (Navigation Repeat)**: Press this key to repeat the last voice guidance prompt.

**FAV (Favorite)**: Press this key to access the preset radio stations.

**AUDIO**: Press this key to access the full audio screen.

**MENU**: Press this key to adjust features for sound, radio, navigation, and the display.

**SEEK**: Press these keys to seek radio stations, CD tracks or DVD chapters.

**Note**: Engaging in extended searching for specific audio stations or songs by using buttons and knobs — or giving extended attention to entertainment tasks — can lead you to look away from the road frequently or for prolonged periods, which may cause you to miss seeing things on the road that you need to see. Avoid engaging in extended searching for specific items while driving.

**Setting Radio Station Presets**

You can set up to six pages of any combination (AM, FM, or XM, if equipped) of preset radio stations, with up to five stations on each page.

To set the number of favorite station pages:

1. Press the MENU hard key to access the menu screen.
2. Touch the Radio screen button.
3. Touch the FAV (Number of Preset Pages) screen button.
4. Touch the desired number of preset pages.

To preset radio stations:

1. Press the AUDIO hard key to access the audio source screen and select the desired band (AM, FM, or XM, if equipped).
2. Use the SEEK hard keys or the Tune knob to select a station.

3. Press the FAV hard key to select the desired page of presets (up to six pages).

4. Touch and hold one of the five radio preset screen buttons until a beep sounds or the station is displayed on the screen button.

**Entering a Destination**

Before entering a navigation destination, shift the vehicle into Park.

To set a destination by entering a street address:

1. Press the DEST hard key.

2. Set or verify the search area corresponds with the final destination.

3. Touch the Address Entry screen button.

4. Touch the City or Street screen button and use the on-screen alpha keypad to enter the city or street name.

5. Touch the List screen button to select the desired city or street from a list of matches with the same name.

6. Touch the House # screen button and enter the house number.

7. Touch the Go screen button to enter as a destination.

8. Touch the Start Guidance screen button.

---

**XM® Radio**

XM Radio offers more than 170 channels of digital-quality sound that goes wherever you go — coast to coast.

After a free three-month trial subscription, activation fee and service subscription fees apply. Service is based in the continental United States and Canada. For more information, visit XM online at [www.XMradio.com](http://www.XMradio.com) or call 1-800-929-2100.

See Section 3 of your Owner Manual.

---

**Bluetooth® System (if equipped)**

The in-vehicle Bluetooth system allows users with a Bluetooth-enabled cell phone to make and receive hands-free phone calls using the vehicle’s audio system, microphone and controls. The Bluetooth-enabled cell phone must be paired with the in-vehicle Bluetooth system before it can be used in the vehicle. Not all phones will support all functions.

Visit [www.chevrolet.com/bluetooth](http://www.chevrolet.com/bluetooth) or [www.gmc.com/bluetooth](http://www.gmc.com/bluetooth) for more information.

For instructions on how to use the system, see Section 3 of your Owner Manual.
Getting to Know Your Silverado/Sierra 2-Mode Hybrid

**Audio Steering Wheel Controls**

The following audio controls are located on the right side of the steering wheel:

+ – (Volume): Pull up on the + or – button to increase or decrease the volume.

้อย (Next/Previous/End): Press the ▲ ▼ up or down arrow to go to the next or previous radio station stored as a favorite or, when a CD is playing, to the next or previous track. Press the ◼ (End) button to end or reject an OnStar or Bluetooth call.

SRCE (Source): Press this button to switch between AM, FM, XM (if equipped), CD and AUX. Press and hold the button for one second to initiate the navigation system voice recognition (if equipped).

▶ (Seek): Press this button to go to the next radio station.

_wire (Mute/Push to Talk): Press this button to mute the vehicle speakers. Press and hold the button for two seconds to interact with the OnStar or Bluetooth system (if equipped).

See Section 3 of your Owner Manual.

**Rear Seat Audio System (if equipped)**

The Rear Seat Audio (RSA) system allows front seat and rear seat passengers to listen to different entertainment sources at the same time using the rear seat controls and wired headphones (not supplied) or wireless headphones (if equipped).

- Press the SRCE (Source) button to select an entertainment source.
- Turn the left or right volume knob to adjust the volume of the left or right wired headphones.

See Section 3 of your Owner Manual.
**CONVENIENCE**

**Automatic Headlamp System/Exterior Lamps and Interior Lamps**

The Automatic Headlamp System turns on the Daytime Running Lamps (DRLs) in the daytime and the headlamps and other exterior lamps at night or when necessary. The system uses a light sensor, located on top of the instrument panel, to determine light conditions. For proper operation, avoid placing any objects on or near the sensor.

**Exterior Lamps Control**

The exterior lamps control knob, located on the left side of the instrument panel, can be rotated to the following positions:

- **AUTO (Automatic Lamp Control)**: This position turns on the Automatic Headlamp System and DRLs.
- **(Off/On)**: Turn the knob to this position to turn off the Automatic Headlamp System and DRLs. Turn the knob to this position again to turn them on.
- **(Parking Lamps)**: This position turns on the parking lamps and taillamps.
- **(Headlamps)**: This position turns on the headlamps and other exterior lamps.

**Interior Lamps**

The following interior lamp controls are located on the left side of the instrument panel:

- **(Instrument Panel Brightness)**: Turn this pop-out knob to adjust the brightness of the instrument panel lights. Turn the knob fully clockwise to turn on the dome lamps and cargo lamps.
- **(Dome Lamp Override)**: Press in this button to have the dome lamps remain off when a door is open. Press the button again to have the dome lamps turn on automatically when a door is open.

See Section 3 of your Owner Manual.

**Auto Turn Signal**

The turn signal lever includes an automatic lane change signal feature.

- To signal a lane change, raise or lower the lever until the arrow on the instrument panel cluster starts to flash; then release the lever. The turn signal will automatically flash three times.
- To signal a turn, move the lever all the way up or down.

See Section 3 of your Owner Manual.
Windshield Wipers

The controls for the windshield wipers are located on the multifunction lever on the left side of the steering column. The wipers band can be rotated to the following positions:

- **(Mist):** Rotate the band down to this position to turn the wipers on for one wipe.
- **(Off):** Rotate the band to this position to turn off the wipers.
- **(Delay):** Rotate the band up to one of the delay settings to adjust the amount of delay between wipes. The wipers activate more often as the band is rotated upward. The wipers will only wipe once if it is not raining and the vehicle is equipped with the Rainsense™ II System.
- **(Low):** Rotate the band up to this position for steady, low-speed wipes.
- **(High):** Rotate the band up to this position for rapid, high-speed wipes.
- **(Washer):** Push the paddle on top of the multifunction lever to spray washer fluid on the windshield.

See Section 3 of your Owner Manual.

Cruise Control

The following cruise control buttons are located on the left side of the steering wheel:

- **(On/Off):** Press this button to turn the cruise control system on or off.
- **SET – (Set):** Press this button to set a speed, or to decrease the speed if the system is active. When the cruise control speed is set, the cruise control light will illuminate on the instrument cluster.
- **RES + (Resume):** Press this button to resume a set speed, or to increase the speed if the system is active.
- **(Cancel):** Press this button to cancel the cruise control but retain the set speed in memory.

See Section 3 of your Owner Manual.
Universal Home Remote (if equipped)

The Universal Home Remote is a combined universal transmitter and receiver that can activate up to three devices, such as garage door openers, entry door locks, gates and security systems. It’s recommended that you read the instructions in your Owner Manual completely before attempting to program any of the three channels on the Universal Home Remote. The engine should be turned off when programming the remote.

Note: Do not use the Universal Home Remote with any garage door opener that does not have the “stop and reverse” feature or any opener manufactured before April 1, 1982.

See Section 2 of your Owner Manual.

Ultrasonic Rear Parking Assist (if equipped)

This feature uses ultrasonic sensors built into the rear bumper cover to help you avoid colliding with objects when parking the vehicle. It operates only at speeds less than 5 mph.

The rear parking assist display is located near the rear window on the passenger side. The lights on the display provide distance information. Low-toned continuous beeps play out of the speakers when objects are within 23 inches (0.6 m) of the rear bumper.

• To turn the system off or back on, press the (Rear Parking Assist) button located below the climate controls on the instrument panel. The indicator light will illuminate when the system is off.

Note: The Ultrasonic Rear Parking Assist system will not activate if you have a trailer hitch or trailer attached to your vehicle, or a bicycle or other object is hanging out of your vehicle. The system may also be disabled if dirt, snow or ice builds up on the sensors.

See Section 2 of your Owner Manual.

Sunroof (if equipped)

The power sunroof switch, located on the overhead console, includes these features:

✈️ (Vent): From the closed position, press and hold the rear of the switch to vent the sunroof.

✈️ (Open): From the vent position, press and hold the rear of the switch to open the sunroof.

✈️ (Close): Press and hold the front of the switch to close the sunroof.

See Section 2 of your Owner Manual.
When you enter the vehicle after a remote start, the key must be inserted in the ignition and turned to the Run position before driving.

**Note:** The Remote Vehicle Start feature will not operate if the key is in the ignition, the hood is open, or the Check Engine light is illuminated on the instrument cluster.

**Canceling a Remote Start**

To turn off the engine instead of driving after a remote start, do any of the following:

- Press and hold the button until the parking lamps turn off.
- Press and release the Hazard Warning Flashers button. Press it again to turn off the flashers.
- Turn the key in the ignition switch to the Run position and then off.

See Section 2 of your Owner Manual.

---

**Remote Vehicle Start (if equipped)**

This feature allows you to start the engine from outside the vehicle by using the Remote Keyless Entry (RKE) transmitter. The engine will initially start and, if it is not needed by the hybrid system, will go into Auto Stop mode.

The remote start capability must be turned on using the Driver Information Center. The vehicle’s automatic climate control system will default to a heating or cooling mode based on outside temperature.

**Starting the Vehicle**

To remote-start the vehicle:

1. Aim the RKE transmitter at the vehicle. (Transmitter range is within approximately 200 feet of the vehicle.)
2. Press and release the (Lock) button on the transmitter.
3. Immediately press and hold the (Remote Vehicle Start) button for about four seconds. When the parking lamps flash, release the button. The engine will start and the parking lamps will remain on. The engine will continue running for 10 minutes.
4. Repeat these steps for a 10-minute time extension. Only two consecutive remote starts are allowed.
**Tonneau Covers**

**Hard Tonneau Cover (if equipped)**

To open the hard tonneau cover:
1. Open the tailgate.
2. Rotate both rear handles inboard.
3. Pull the clamps down and rotate the assemblies to disengage from the truck box.
4. Once the handles are released, rotate the panel to the open position.
5. Align the clamp assembly bolt (shaft of the handle) with the retention feature and rotate the handle assembly flat onto the panel.
6. Fold the cover forward.
7. Unsnap the retaining strap from the front box and insert the male end into the female end of the front retention buckle. Pull on the strap to verify that both buckles are attached.

To close the hard tonneau cover:
1. Unbuckle both retaining straps.
2. Unfold the tonneau cover.
3. Lower the rear set of handle/clamp assemblies from the stored position.
4. Tilt the handle/clamp assembly so that the locator is in the slot, pull down on the assembly, and slide the clamp under the edge of the bed rail lip.
5. With the locator in the slot, pull the handle toward the rear of the bed. Verify that the clamp is secure and that the handle does not move.
6. Repeat the clamp attachment steps for the opposite side.

Refer to your Owner Manual for the proper procedure to install and remove the tonneau cover.

**Soft Tonneau Cover (if equipped)**

To remove the soft tonneau cover:
1. Open the tailgate.
2. Push down on the rear corner while pulling the release strap to the right.
3. From the driver’s side, roll up the cover tightly.
4. Once the cover is rolled up, remove the female buckles from under the retention loops and engage both tie-down straps. Pull both straps tight.

Reverse this procedure to install the soft tonneau cover.

Refer to your Owner Manual for additional information about the operation of the tonneau cover.

*See Section 2 of your Owner Manual.*
StabiliTrak® – Stability Control System

StabiliTrak is an advanced computer-controlled vehicle stability and traction enhancement system that assists with directional control of the vehicle in difficult driving conditions. It turns on automatically every time you start your vehicle.

To limit wheelspin and help maintain directional control, you should always leave the system on. However, if your vehicle becomes stuck and rocking the vehicle is required, the system should be turned off.

- To turn off the traction control part of the system, press the (StabiliTrak/Traction Control) button located on the center of the instrument panel.
- To turn off both traction control and StabiliTrak, press and hold the button for five seconds. Press the button again to turn on both systems.

When either system is turned off, the (StabiliTrak/Traction Control) light will illuminate.

See Section 4 of your Owner Manual.

Tire Pressure Monitor

The Tire Pressure Monitor alerts you when a significant reduction in pressure occurs in one or more of your vehicle’s tires by illuminating the ( ) (Low Tire Pressure) warning light on the instrument panel cluster. The low tire pressure warning light will remain on until you correct the tire pressure. A CHECK TIRE PRESSURE message will also appear on the Driver Information Center (DIC).

Correcting the Tire Pressure

When the low tire pressure warning light illuminates, you must inflate the tire to the proper tire pressure (just as you must refuel the vehicle when the low fuel warning light illuminates). The Tire and Loading Information label shows the correct tire pressure for the tires when they’re cold. “Cold” means your vehicle has been sitting for at least three hours or driven no more than one mile.

You can temporarily clear the DIC message by acknowledging it with your DIC controls. However, at the next vehicle start-up, the DIC message will reappear if the tire pressure has not been corrected.

During cooler conditions, the low tire pressure warning light may appear when the vehicle is first started and then turn off as you start to drive. This could be an early indicator that your tire pressures are getting low and the tires need to be inflated to the proper pressure.

Note: The Tire Pressure Monitor can alert you about low tire pressure, but it doesn’t replace normal monthly tire maintenance.

See Section 5 of your Owner Manual.
Resetting the Oil Life System

The Oil Life System calculates engine oil life based on vehicle use and displays CHANGE ENGINE OIL on the Driver Information Center (DIC) when it’s necessary to change the engine oil and filter. The Oil Life System should be reset to 100% only following an oil change.

To reset the Oil Life System using the DIC:

1. Turn on the ignition.
2. Press the (Vehicle Information) button until the DIC displays OIL LIFE REMAINING.
3. Press and hold the (Set/Reset) button until 100% is displayed.
4. Turn off the ignition.

See Section 5 of your Owner Manual.

Refueling the Vehicle

The fuel door is located on the driver’s side of the vehicle.

- To open the fuel door, press the center-rear edge of the door and it will pop open slightly. Pull the door to open it fully.
- To close the fuel door, press the rear edge of the door until it latches and is flush with the side of the vehicle.

See Section 5 of your Owner Manual.

Hybrid Service

All service and repair of the hybrid components on your vehicle should be performed only at a Chevrolet or GMC dealership with hybrid-trained service technicians. Non-hybrid service may be performed at any Chevrolet or GMC dealership.

Never try to do your own service on hybrid components. You can be injured and your vehicle can be damaged if you try to do your own service work.

See your Hybrid Owner Manual.
Getting to Know Your Silverado/Sierra 2-Mode Hybrid

As the proud owner of a new Chevrolet or GMC vehicle, you are automatically enrolled in the Chevrolet or GMC Roadside Assistance program.

Roadside Assistance features a toll-free number staffed by a team of technically trained advisors who are available 24 hours a day, 365 days a year. The advisors can provide minor repair information or make arrangements to tow your vehicle to the nearest Chevrolet or GMC dealer.

Chevrolet or GMC will warrant certain hybrid components for 8 years/100,000 miles (see your Warranty Manual). In addition, Chevrolet or GMC will provide the following services for 5 years/100,000 miles at no expense to you:

• Fuel delivery
• Lockout service (identification required)
• Tow to nearest dealer for warranty service
• Flat tire assistance
• Jump starts

In many instances, mechanical failures are covered under Chevrolet’s or GMC’s comprehensive warranty. However, when other services are utilized, an advisor will explain any payment obligations you might incur.

For prompt and efficient assistance when calling, please provide the following information to the advisor:

• Location of the vehicle
• Telephone number and your location
• Vehicle model, year and color
• Vehicle mileage
• Vehicle Identification Number (VIN)
• Vehicle license plate number

Chevrolet and GMC reserve the right to limit services or reimbursement to an owner or driver when, in Chevrolet’s or GMC’s judgment, the claims become excessive in frequency or type of occurrence.

Roadside Assistance and OnStar

If you have a current OnStar subscription, press the OnStar button and the vehicle will send your current GPS location to an OnStar Advisor who will speak to you, assess your problem, contact Roadside Assistance and relay your exact location so you will get the help you need.

Owner Center

The Chevrolet Owner Center and GMC Owner Center, complimentary services for Chevrolet and GMC owners, are one-stop resources to enhance your ownership experience. Exclusive member benefits include online service reminders, vehicle maintenance tips, online owner manual, special privileges and more. Sign up today at www.gmownercenter.com/chevrolet or www.gmownercenter.com/gmc.

Certain restrictions, precautions and safety procedures apply to your vehicle. Please read your Owner Manual for complete instructions.
